ADVANCED EXCEL TOOLS WORKSHOP

**Q:** What do these tools have in common?

**A:** They are missing from almost all Lean Six Sigma training programs.

## ANALYSIS IN EXCEL ISN'T ALWAYS SO SIMPLE.

Talk to us about our Advanced Excel course for Business Leaders, Green Belts, and Black Belts. We leverage what they already know and integrate critical Excel skills to drive even better analysis, data preparation and manipulation, and decision-making.

Illustrated with a case study and practical exercises, the course reinforces the key concepts of Lean Six Sigma Process Streamlining and Engaged Team Performance (ETP) while practicing advanced Excel operations that every leader should know.

**UNLOCK THE FULL POWER OF YOUR DATA!**
